Introduction

Background

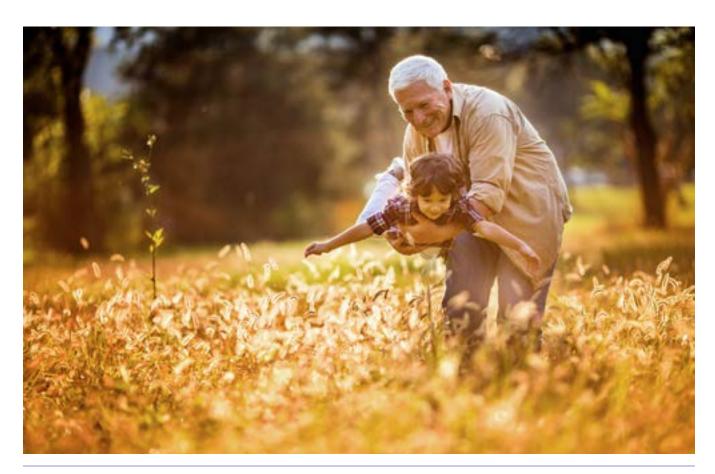

Preventive care is essential to staying healthy. It can help catch problems early or prevent them entirely and help patients live independently for longer.

Annual wellness visits (AWVs) are:

- A critical pathway to identifying high risk patients and helping them to develop personalized prevention plans to prevent illnesses, including immunizations, medication review, and advanced care planning.
- · A valuable tool to ensure appropriate quality gaps are closed.
- · A crucial way to keep patients attributed to the Accountable Care Organization (ACO).

Patients who have Medicare Part B are eligible to receive one annual wellness visit every 12 months, free of charge. Developing and expanding initiatives to increase annual wellness visit awareness and participation among our Medicare population should lead to improved quality of life and lower health care costs for our elderly patients. Studies show a 5.7% reduction in adjusted total healthcare costs and up to 79% greater performance on certain clinical quality measures. Beneficiaries who had an AWV were also more likely to receive recommended preventive clinical services including screenings for fall risk, colorectal cancer, and breast cancer, depression screening and follow-up, and tobacco screening and cessation.

CommonSpirit Health ACOs enterprise-wide data during July 2019 through March 2020 indicated that 26% of our Medicare beneficiaries had an AWV. With the focus on AWV as an enterprise-wide initiative, 53% of our Medicare beneficiaries had an AWV during January 2023 through December 2023. There is still an opportunity for an additional 107,000 ACO MSSP attributed patients who could benefit from an AWV.

Introduction 3

Measure Definition

Annual Wellness Visit

Objective

Improve compliance with annual wellness visits for preventive care.

Rationale

Preventive care is essential to staying healthy. It can help catch problems early or prevent them entirely, and help patients live independently for longer. Annual wellness visits are a critical pathway to identifying high risk patients and helping them to develop personalized prevention plans to prevent illnesses, including immunizations, medication review, and advanced care planning. Patients who have Medicare Part B are eligible to receive one annual wellness visit every 12 months, free of charge. Developing and expanding initiatives to increase annual wellness visit awareness and participation among our Medicare population should lead to improved quality of life and lower health care costs for our elderly patients.

Metric

Percentage of Medicare beneficiaries participating in a CommonSpirit Health Accountable Care Organization (ACO) Medicare Shared Savings Program (MSSP) that have had an annual wellness visit (AWV) within the measurement period

Numerator

Beneficiaries completing an AWV with an allowed charge determined by one of the following codes during the measurement period:

- G0402 Initial Preventative Physical Examination
- G0438 Annual wellness visit, initial visit
- · G0439 Annual wellness visit, subsequent visit

Denominator

MSSP Medicare beneficiaries assigned to a CommonSpirit Health MSSP ACO Organization based on the most recent CMS supplied assignment list for the performance period. Final performance will be based on the Q4 assignment file.

Inclusion/Exclusion Criteria

Exclusion Criteria:

- ACO does not share data with enterprise
- · Beneficiary becomes deceased
- Beneficiary becomes excluded on the most recent CMS supplied assignment list for the performance period

National Contact: Kelly Bitonio, BSN, MHA, NEA-BC, CPHQ, System Director Ambulatory Quality Helena Moon, MD, System Director Clinical Programs

Data Source: CMS

How to Use the Annual Wellness Visit Toolkit

Annual Wellness Visits have been linked to the improvement of the health of our senior beneficiaries and lowering their overall health costs. Tools and evidence-based strategies have been developed to facilitate our Accountable Care Organizations in the implementation and improvement of compliance with Annual Wellness Visits. Materials and links to downloadable documents are included.

Key strategies for success have been identified to aid your ACO in increasing Annual Wellness Visit compliance rates. The following four primary strategies are supported by this toolkit:

- Make AWV an ACO priority by identifying AWV champions
- Promote patient engagement with scripting, reminder letters/cards, proactive scheduling practices and patient facing public reminders
- Optimize clinic management of AWV by top down communication of AWV as a priority, increasing the
 visibility of the data, utilizing pursuit lists to identify patients needing an AWV and increasing the use of
 telehealth where feasible
- Enhance the workflow efficiencies of an AWV through use of a multidisciplinary team approach and incorporating the use of allied professionals, telehealth visits and optimizing EHR documentation

Please use tools and templates to implement or augment your AWV program across all CSH clinics.

Link to Annual Wellness Visit Resources

Key Strategies for Success

1 Establish AWV as an ACO priority

- Designate a AWV Champion
 - Form an improvement team
 - Ensure AWVs are a standing agenda item in ACO leadership meetings
 - Provide regular updates in clinic huddles and on bulletin boards
 - Link AWVs to other relational outcomes i.e. HTN, Preventive Screenings
- · Increase visibility and transparency of performance data in key stakeholder venues
 - Schedule regular team meetings (weekly recommended) to monitor gaps, action plan, progress, and outcome data
 - Increase communication of results and remove barriers throughout all levels of ACO
 - Celebrate successes

2 Promote patient engagement

- · Communicate and educate beneficiaries on the importance of and benefit to having an AWV
 - Use scripting for all staff associated with AWV to promote AWVs
 - Use letters or birthday cards to remind beneficiaries to schedule AWV
 - Public Reminders: Relay the importance of AWV in public spaces
 - AWV posters or flyers
 - Video campaign in office waiting areas (for those who have the capability)
- Proactive scheduling practices for AWV
 - Promote appropriate AWV type during scheduling opportunities
 - When verifying Medicare eligibility, schedule appropriate Medicare Wellness Visit type
 - Schedule patient when making follow-up appointments
 - 365 day lookback for new Medicare beneficiaries
 - Schedule subsequent AWV upon current AWV exit

3 Optimize clinic management of AWV

- · Promote use of EHR registries for patient outreach and follow up
 - Pursuit lists
- Prioritize and promote AWVs within ACOs and clinics
 - Use of editable educational deck for town halls and lunch and learns
 - · Orient leaders and providers to AWV toolkits for benefits, coverage and resources available

Key Strategies for Success

- Incorporate AWV and sharing of best-practices across the enterprise
 - Promote provider participation in Population Health and Ambulatory Quality Division Lead meetings and office hour calls
 - Use local quality meetings to address barriers to success

4 Enhance workflow efficiencies for AWVs

- Build an accountable AWV team at the direction of the ACO leadership
 - A multidisciplinary clinic team works together to coordinate AWV
 - Identify clinic team roles for AWVs dependent on clinic workflow
 - Map out responsibilities to be carried out by each member of the team
 - Incorporate AWV in care coordination workflow for enrolled beneficiaries or discharge follow-up calls
- Increase use of telehealth for AWV
 - Convene clinical leaders to determine best practices for virtual AWVs
 - Providers are educated on AWV using telemedicine
 - Incorporate an alternative to in-person office visits to increase patient participation with the use of telehealth
 - Consider patient preference in visit modality if telehealth is available
 - Plan virtual AWV workflow for efficiency
 - Use standard guidelines for virtual visits
 - Ensure coding practices are implemented for virtual annual visits
- Expand performance of AWV to Advanced Practice Partners
 - · Increase capacity to perform AWV through use of Advanced Practice Professionals
 - · Utilize team members at the top of their license to move patients through AWV more efficiently
 - State regulations are taken into consideration
- Standardize AWV documentation in EHRs
 - Optimize AWV documentation process
 - Promote use of EHR embedded AWV templates for complete documentation
 - Standardized paper tool for EHRs without template available
 - Use of coding tip sheets for AWVs
 - Promote use of pre-visit checklist for preventive service schedules

Key Strategies for Success 7

Instructions for Gap Analysis Tool

What is this tool?

This is a supplementary tool for ACO and/or CIN leads to use as needed with clinics in their market to:

- Compare the evidence-based "must have" improvement strategies with the processes currently in place within the clinic.
- Determine the "gaps" between current clinic practices and identified best practices.
- Provide a structured approach in documenting action plans to address identified "gaps".
- Provide a reference of available resources to support improvement efforts.

Who should use this tool?

The ACO and/or CIN leads will coordinate within their market the clinics that might benefit from utilizing this tool. It is recommended that the selected "appropriate" clinics (i.e. primary care and select specialty clinics who may perform annual wellness visits) establish improvement teams or workgroups to develop action plans to address identified gaps and successfully deploy improvement strategies.

This tool is not a required and there is no due date for submission of the gap analysis for Annual Wellness Visits. However, for the ACO and/or CIN leads that plan to use this tool, we suggest deploying it ASAP for maximal input and benefit during the current performance year.

How can the tool help you?

Upon completion of the gap analysis, providers and clinic team members will have:

- An understanding of the differences between current clinic practices and evidence-based, best practices related to AWV within the clinic setting.
- An assessment of the barriers that need to be addressed before successful implementation of best practices.
- An awareness of available resources to support improvement efforts.

Instructions

- 1. Mark the corresponding number which reflects your clinic's level of readiness for each strategy item.
- 2. If the recommended improvement strategy or associated elements are not able to be deployed or supported within your clinic, provide a brief description of reason under the Comments column.
- 3. Planned improvement strategies to address identified practice gaps should be documented on the Action Planning Document.

Completed gap analysis and Action Planning document should be returned to the respective ACO and/or CIN leads. Measure Leads are also available to answer questions and/or offer assistance with this evaluation.

THANK YOU!

Instructions for Gap Analysis Tool

Division	Clinic	Date of Completion
		Date of Completion

For each Improvement Stategy please use the following scoring method:

- 1 Tactic not in place, difficult to develop
- 2 Tactic not in place, can be developed
- 3 Tactic variably in place, difficult to scale
- 4 Tactic in place, can be scaled
- 5 Tactic well embedded consistently

Additional Comments:

Gap Analysis Action Plan

Champion Role Description

Recommended Clinical Lead: Medical Director of ACO or ACO Quality Lead

Clinical Champion: Clinic Dyad of Operations and Clinical

Recommended ACO Lead: ACO Executive Director or VP

Role Summary

In collaboration with the Population Health Physician Leads and ACO leadership, the Annual Wellness Visit Champion is authorized to serve as a liaison and coordinate implementation of evidence-based practices and strategies to improve care for Medicare beneficiaries through the use of annual wellness visits within the clinic setting. This individual may be a clinician or other member of the healthcare team overseeing annual wellness visits improvement activities within one or multiple clinics. Experience has shown a dyad partnership with a clinical and operational lead has been most successful.

Desired Skills

- 1. Knowledgeable and enthusiastic about annual wellness visits with appropriate expertise and experience
- 2. Good communication skills and able to work well with others
- 3. Willing/able to invest time in necessary activities including conducting or coordinating educational presentations to providers and clinic staff, sharing performance outcome data and promoting annual wellness visit activities

Functions and Duties as Goal Champion

- 1. Actively and enthusiastically promote annual wellness visits as a practice/clinic improvement priority
- 2. Collaborate with providers and clinic managers to facilitate a gap analysis of current annual wellness visit practices within assigned clinic(s) and promote, advocate and implement an improvement plan using evidence-based strategies to address identified gaps
- 3. Provide input and leadership for implementation, monitoring, and evaluation of deployed improvement strategies
- 4. Work collaboratively with providers and clinic staff to leverage and optimally utilize clinic infrastructure to:
 - Facilitate clinic approach to support adherence to annual wellness visit improvement strategies as directed by the Population Health Physician Leads and ACO leadership group and gap analysis findings. (For example, oversee establishment of an improvement team or work group to focus on these efforts.)
 - Mentor providers, clinic staff, improvement teams to effectively apply improvement methods and tools
 - Facilitate process for periodic review, monitoring and sharing of performance outcome data reports
 - Celebrate key milestone achievements

Champion Role Description 17

Frequently Asked Questions

ABOUT THE MEASURE

O What is the definition of the Annual Wellness Visit measure?

A Percentage of Medicare beneficiaries participating in an Accountable Care Organization (ACO) Medicare Shared Savings Program (MSSP) that have had an annual wellness visit (AWV) within the measurement period (Higher is better).

Q What is the data source?

A Numerator data will be based on a set of monthly CCLF (Claim and Claim Line Feed) files received by each individual MSSP ACO which are then transferred to the PSR team for loading into the PDW.

Denominator data will be based on assignment lists received by each individual MSSP ACO which are then transferred to the PSR team for loading into the PDW. Retrospective assignment lists are updated and provided quarterly by CMS. Prospective assignment lists are provided annually with slight updates quarterly when beneficiaries become excluded.

Q What is the time period for the metric?

A The baseline data is from January 2023 through December 2023.

The performance data is from January 2024 through December 2024.

ABOUT AWV

Q Who is eligible for the AWV?

A Medicare covers an AWV for all beneficiaries who are no longer within 12 months after the eligibility date for their first Medicare Part B benefit period, and who have not had either an IPPE or an AWV within the past 12 months. Medicare pays for only one first AWV per beneficiary per lifetime and one subsequent AWV per year thereafter.

Q Is the AWV the same as a beneficiary's yearly physical?

A No. The AWV is not a routine physical that some older adults may get periodically from their physician or other qualified non-physician practitioner. Medicare does not cover routine physical examinations.

Q Are clinical laboratory tests part of the AWV?

A No. The AWV does not include any clinical laboratory tests, but you may make appropriate referrals for such tests as part of the AWV.

Q Do deductible or coinsurance/copayment apply for the AWV?

A No. Medicare waives both the coinsurance or copayment and the Medicare Part B deductible for the AWV.

Frequently Asked Questions 18

Q Can I bill an electrocardiogram (EKG) and the AWV on the same date of service?

- A Generally, you may provide other medically necessary services on the same date of service as an AWV. The deductible and coinsurance or copayment apply for these other medically necessary services.
- Q How do I know if a beneficiary already got his/her first AWV from another provider and know whether to bill for a subsequent AWV even though this is the first AWV I provided to this beneficiary?
- A You have different options for accessing AWV eligibility information depending on where you practice. You may access the information through the Health Insurance Portability and Accountability Act (HIPAA) Eligibility Transaction System (HETS) or through the provider call center Interactive Voice Responses (IVRs).

CMS suggests providers check with their Medicare Administrative Contractor (MAC) for options available to verify beneficiary eligibility. Contact your MAC for more information.
